                            Hello! I am a Software and Unity Developer currently pursuing my Bachelor of
Science in
                            Computer Science and Masters of Engineering in Software Engineering at the
University of
                            Cincinnati. I am actively seeking an internship
```

opportunity at a Tech Company where my skills in Software Engineering, Software Improvement, Game Development, AI Development, or Data Science can contribute to the company's success. I have previously been employed through Chipotle, University of Cincinnati, and Siemens DISW, in which I learned a lot of my skills.

During my time at UC and in previous job opportunities, I have honed various skills including project management, teamwork, leadership in team settings, and effective communication with co-workers and team members. Additionally, I possess extensive experience with multiple programming languages acquired through classroom learning, coding camps, and personal projects, which are showcased on my GitHub Profile.
Specifically, I have:

<ul style="text-align: left;">
  5 years of experience with C# with applications and Unity Game Engine
  3 years of experience with Python in AI, data science, web applications and applications
  2 years of experience with C++ for applications.
  Introductory experience with HTML/CSS/JavaScript/PHP, and some frontend frameworks for web design
  Introductory experience with MySQL and Postgres for databases

Please feel free to reach out to me! I am enthusiastic about exploring new opportunities and contributing to innovative projects.
